### Summary

I'm a Software Engineer with an interest in designing websites, especially things related to Front-end stacks and UX Designer. I am always eager to take on new challenges and opportunities that push me out of my comfort zone and help me grow as a developer

### Work Experiences

#### Software Engineering

Jul 2021 - Apr 2023

##### [Datahouse Asia](#)

Consult & design Front-end architecture and solutions:

- Implement reusable components and authentication for all projects using React.
- Improve website performance (React) by preventing re-rendering in Formik, reducing API calls, and minimizing actions in Redux.
- Implement utility functions and containers in F.E monorepo using Git submodules.
- Writing documentation related to F.E development in the project.

Research and apply new technologies to the Front-end repository:

- Replace asynchronous state management in Redux-saga with React-Query.
- Initialize the repository and decide which libraries to use in the F.E React project.

Manage tasks & efforts for the Front-end team:

- Provide high-level estimation for the project.
- Separate and breakdown tasks, and assign them to F.E team members.

Review code & support team members.

- Manage branches
- Ensure team members write commits in the correct format.

Interviews and provide technical training for interns and new junior React developers:

- Organize a workshop every 2 weeks to share news and updates about React
- Mentoring interns / junior developers

Technologies: React, Redux, React Query, Formik, Restful API, AWS services, Firebase, SEO

Domain: US public sectors

#### Freelance Web Developer

Aug 2020 - Present

##### [An Hung Website \(May 2023\)](#)

A website for An Hung architectural construction investment

Technologies: NextJS, Zustand, Sanity, SEO

##### [RAM Labs Website \(May 2023\)](#)

An E-commerce website for selling product collections, collab with artists & sell their design

Technologies: NextJS, Zustand, Sanity, SEO

##### [INUTDesign.com \(Sep 2022\)](#)

An E-commerce website for customizing laptops, mobile, camera skin

Technologies: NextJS, Sanity, Firebase, Framer motion, SEO

##### [TapTapOn.Me \(May 2021\)](#)

My small start-up project, which provides the Smart Business Card by NFC technology  
User can customize their information, and scan NFC card to share their profile

Technologies: React, Redux, Firebase, SEO

##### [KingstoneDanang.com \(Mar 2021\)](#)

A website for Interior - Exterior Decoration Company Limited company

Technologies: React, Redux, Sanity, Firebase, SEO

##### [NOOR Coffee Website \(Dec 2020\) - NOOR Kombucha Website \(Jun 2021\)](#)

A website for the coffee shop

Technologies: React, Redux, Sanity, Firebase, SEO

### Technical Skills

#### PROGRAMMING LANGUAGES:

JavaScript, TypeScript

#### FRAMEWORKS & LIBRARY:

F.E: React, NextJS, Redux

CSS: SCSS, Material-UI, TailwindCSS

#### DESIGN, PROTOTYPE:

Photoshop, Figma

#### CI/CD:

GitHub Actions, Vercel

#### DATABASE:

NoSQL: Firebase

### Personal Skills

Work independently

Documentation

Analysis Skills

User Experience

Design

### Languages

Vietnamese:

*Native or Bilingual Proficiency*

English:

*Limited working proficiency*

### Education

Bachelor: Software Engineer (2017-2021)

#### [Duy Tan University](#)

GPA: 3.2/4

Highest Capstone Project score (9.8/10) in that semester.

Certified for participation in Scientific Research

First prize at DTU University-level Scientific Research Conference 2021
